# PATIENT SLIPPERS

**Stedi-Treds** are designed for Fall Prevention, preventing patients from slipping, tripping and falling.

It is estimated 700,000 patients fall each year resulting in up to 50% of patients sustaining an injury. These injuries result in extended hospital stays with an additional cost of \$6,000 per case and when serious, add approximately \$14,000 to the patient's care with non-reimbursable patient care costs (X-rays, CT scans, treatment(s) and possibly surgery(ies)).<sup>1,2</sup>

Slippers are an integral part of a Hospital Fall Prevention Program.

Medegen Medical Products **Stedi Tred®** patient slippers have slip resistant tread on both sides giving patients a greater level of confidence. The dual tread delivers effective footing in any position, plus the material is comfortable and adapts to a patient's foot.

### FEATURES/BENEFITS:

- Stedi Tred® design offers an ideal level of stable footing, reducing the risk of slippage and avoiding tripping at the same time
- Our double-sided tread keeps maximum tread coverage even if slipper rotates, minimizing the risk of falls
- Patients love the comfort from the tip of the toes to the top of the cuff
- Superior knit construction provides better patient comfort
- Stretchable cuff expands to adapt to patient's ankle in the event of swelling
- Bariatric Plus slippers feature an elongated expanded cuff to fit large extended calves.
- Made with memory yarn to keep size and shape and last longer
- User friendly, easy to open packaging
- Shoe size guidance for better patient fit
- Typical areas of use: Acute Care Facilities, Ambulatory Surgery Centers, Nursing Homes, Long Term Care Facilities, Assisted Living or anywhere patients need an additional level of security
